Relevant Projects and Experience

iOS Developer – H.H. Brown

Built an iOS application using Xcode for a division of H.H. Brown, a Berkshire Hathaway company. Worked in a team with a graphic designer and the head of programming to learn the basics of user experience and interface design.

Website – taha.vasowalla.com

Showcases most of my projects and hosts what I've learned about website design and development. Updated whenever I find something new.

Hackathon – H.H. Brown Shoe Hack

Built a game using the provided API to showcase the company's catalog of shoes. Hosted by H.H. Brown, a specialty shoe company. Won Best Web App and hired for a summer internship.

SARndbox – Augmented Reality Sandbox

Built a physical sandbox with an Xbox Kinect and a projector attached to overlay the surface of the sand with a topographical map. Designed and planned sandbox structure and computer setup.
